

Emily A. Haozous, Ph.D., RN, FAAN

Nurse/Research Scientist, Pacific Institute for Research and Evaluation - Southwest Center

Emily A. Haozous (Chiricahua Fort Sill Apache) is a nurse and research scientist with the Pacific Institute for Research and Evaluation - Southwest Center, based in Albuquerque, New Mexico. Dr. Haozous conducts community-based and community-guided research and evaluation in collaboration with Native American partners, including urban tribal centers, reservation-based tribal organizations, and tribal governments. Her work is focused on issues of access to care, health equity, cancer and non-cancer pain management, cultural tailoring, and national trends in premature mortality. Dr. Haozous humbly offers her research forward in recognition of the generations that came before her, and with the desire to build a better world for the generations yet to come. Dr. Haozous has a clinical background in oncology, hospice, and palliative care nursing. Dr. Haozous received her undergraduate degree in music from the University of California, Santa Cruz and her master's degree and Ph.D. in nursing from Yale University.
