# ODS MMM Program Updates

- **DSLDD** (Dietary Supplement Label Database)
  - Provides label information on over 76,000 products.
  - 300 labels indicate products intended for pregnant and lactating women.
  - With respect to prenatal dietary supplement labels, ODS is interested in working with other Federal agencies to link the database to Federal websites with a maternal health focus.
  - (DSLDD) <https://www.dsld.nlm.nih.gov/dsld/index.jsp>
- **2017: Proceedings of NIH ODS Workshop, “Iron Screening and Supplementation in Iron-Replete Pregnant Women and Young Children”**  
[American Journal of Clinical Nutrition: Volume 106 \(Suppl 6\);](#)

# ODS MMM Future Research/Programs

- New Program: **Resilience & Health Studies**
  - **Mission:** Understand the biological mechanisms and systems interactions that affect an individual's capacity to resist or adapt to challenges (including biological and environmental stressors) such that adequate function and structure are maintained.
  - **Potential MMM relevance:** Determine how resilience is manifested differently in pregnant women and determine how these differences may impact physiological and preventative responses to nutrient or preventative interventions.
